Jack Hansjee

Software Development in Javascript

 jansg08 | in Jack Hansjee | jack@hansjee.com | 07443 019 881 | London

SUMMARY

A keen interest in problem-solving has manifested itself in the pursuit of a software development position aided by the strong communication and analytical skills developed through the Northcoder's bootcamp. Proven to be a fast learner and a hard worker through time there as well as during a year out in a rare opportunity as a senior member of an auction house, managing and developing their technology platform.

WORK EXPERIENCE

Head of Information Technology, Hotlotz Auctioneers   Jun 2020 – Aug 2021

Responsibilities
– Purchasing and maintaining IT infrastructure within the saleroom and offices
– Negotiating supplier contracts for long-term technological-related needs
– Supporting customers with queries regarding the website and the bidding process for online auctions
– Incorporating customer feedback to improve the website's user experience

Achievements
– Project managed a major overhaul of the company's website and online bidding platform
– Oversaw complete redesign of the website's frontend and a ground-up rebuild of the backend to improve the efficiency of stock-tracking
– Liaised with a software development company over nine months using design mock-ups to clearly impart the Managing Director's Vision
– Assisted the accounting department in preparing the company to become tax-registered by creating a pricing tool that allows the commission structure to be reverse-engineered using a desired net profit figure.

OTHER INTERESTS

Sergeant, Air Training Corps   Sept 2015 – Jul 2018

Responsibilities
– Training junior cadets in core skills such as drill and theory of flight
– Resolving conflicts arising between cadets and promoting social behaviour

Achievements
– Built a comprehensive training structure to create a more engaging experience for cadets
– Received an award recognising outstanding community service by the Lord Lieutenant of Greater London
– Completed the 'Master Cadet' course consisting of principles of flight and propulsion theory
– Completed the ACLC, the highest badge earned for leadership within the ATC
